1. Time-to-degree is measured in quarters.

2. Time-to-degree does not include summer quarters, so a four year graduation rate would be equal to 12 quarters.

3. The graduating cohort includes those students who received a degree from Fall-to-Summer of each year and who started as new, full-time students.

4. For students who graduated in more than one major, time-to-degree is reported for the student’s primary major’s school at graduation.

5. See Enrollment Notes and Graduation Rates Notes for more information.
